01 Executive overview

Scope: all markets, shipping modes, customer segments and order statuses | 01 Jan 2015 - 31 Jan 2018

Net booked sales	Recorded profit	Recorded margin	Distinct orders	Late delivery rate
33.05M	3.97M	12.0%	65,752	57.3%

Net sales - full monthly history

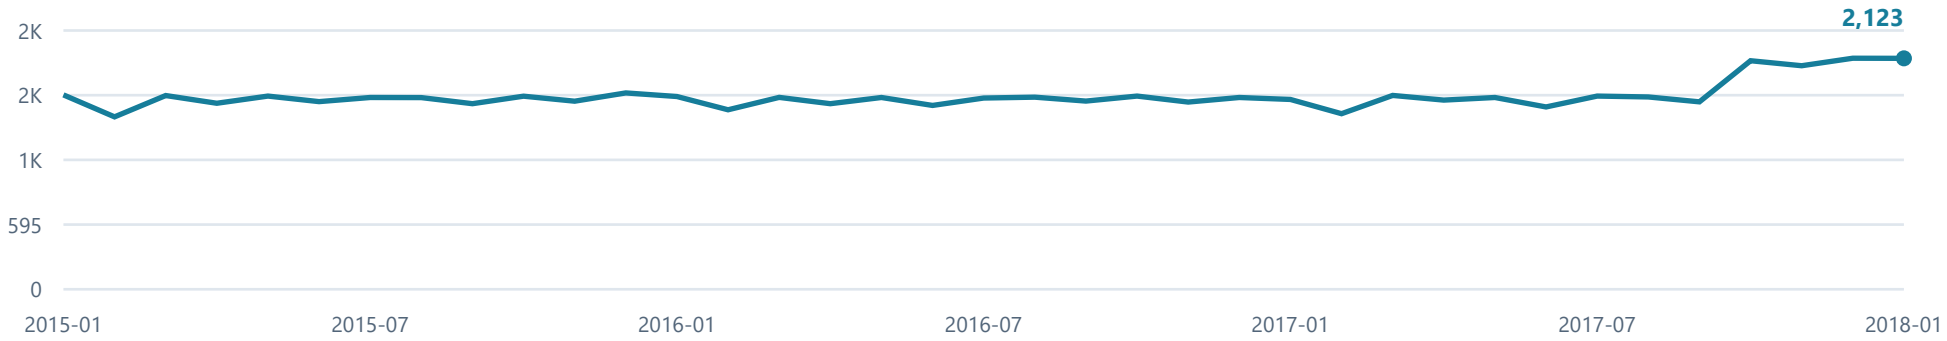

Management focus. Positive aggregate profit coexists with weak delivery reliability and a sharp late-period reduction in basket value. Validate delivery commitments and the source/product-mix change before attributing causes.

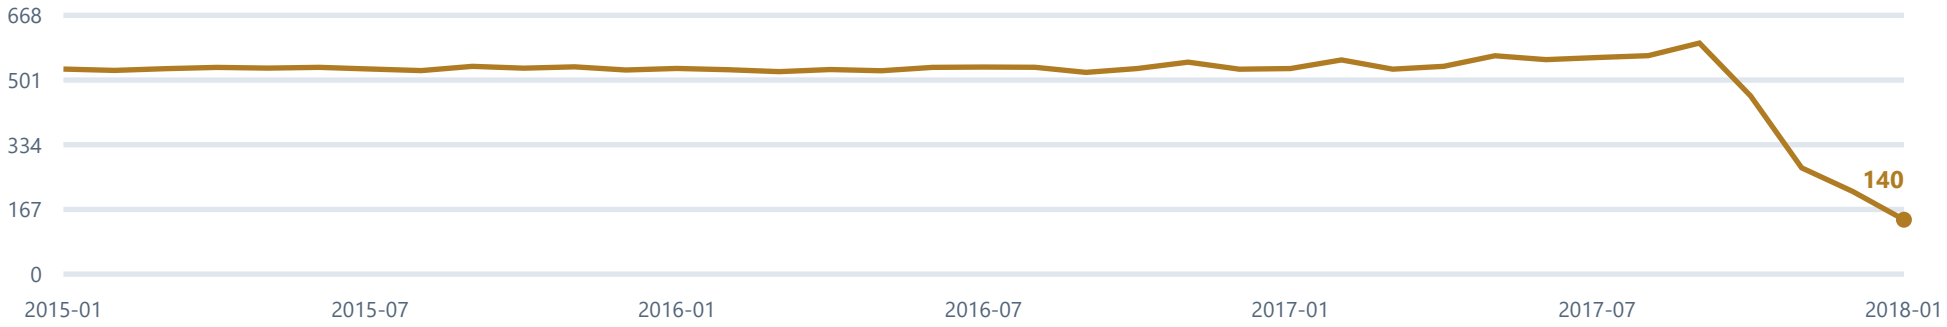

02 Sales, volume and basket value

Monthly history is shown in full. January 2018 is compared with January 2017, not with a full prior year.

Orders per month

Average order value after discounts

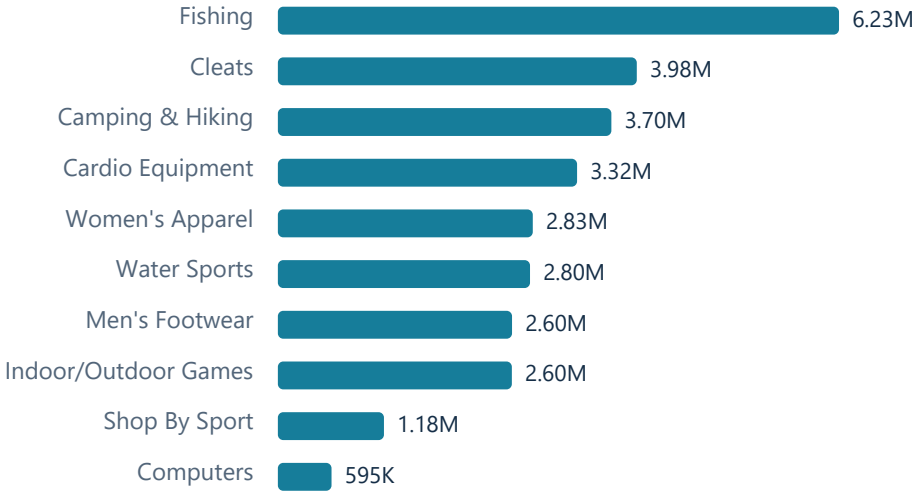

January comparison. Orders rose 21.7% to 2,123, while net sales fell 67.8% to 0.30M. Average order value fell from 530.36 to 140.35. Investigate product mix, quantities and source completeness.

03 Profitability and discount exposure

Recorded benefit includes only costs represented in the source. Financial totals include all order statuses.

Gross sales	Discount value	Weighted discount	Loss-making orders	Loss-making rate
36.78M	3.73M	10.1%	13,909	21.2%

Top 10 categories by net sales

Category	Net sales	Margin
Fishing	6,226,935	12.1%
Cleats	3,982,857	12.4%
Camping & Hiking	3,700,784	11.6%
Cardio Equipment	3,320,251	11.5%
Women's Apparel	2,828,708	12.4%
Water Sports	2,798,044	11.6%
Men's Footwear	2,598,494	12.0%
Indoor/Outdoor Games	2,596,454	12.3%
Shop By Sport	1,177,186	11.0%
Computers	595,395	11.7%

Loss exposure. 13,909 whole orders had negative total benefit, contributing -2.62M. An item loss does not necessarily make the whole basket unprofitable. Discounts and lateness are associations, not established causes.

04 Delivery reliability

Distinct orders | Late rate excludes Shipping canceled | Early and on-time deliveries both meet the scheduled window

Eligible orders	Late orders	Late rate	On-time or early	Mean late delay
62,897	36,048	57.3%	42.7%	1.62 days

Shipping mode	Eligible orders	Late orders	Late rate	Actual days	Scheduled days
First Class	9,602	9,602	100.0%	2.00	1.00
Second Class	12,256	9,803	80.0%	4.00	2.00
Same Day	3,407	1,648	48.4%	0.48	0.00
Standard Class	37,632	14,995	39.8%	3.99	4.00

The promise matters. First Class averages 2 actual days against a 1-day commitment, while Standard Class averages about 4 days against a 4-day commitment. First Class is faster in elapsed time but less reliable against its promised window.

05 Delivery by market and mode

Rates use noncanceled orders. Counts are shown separately so a high rate can be assessed against its volume.

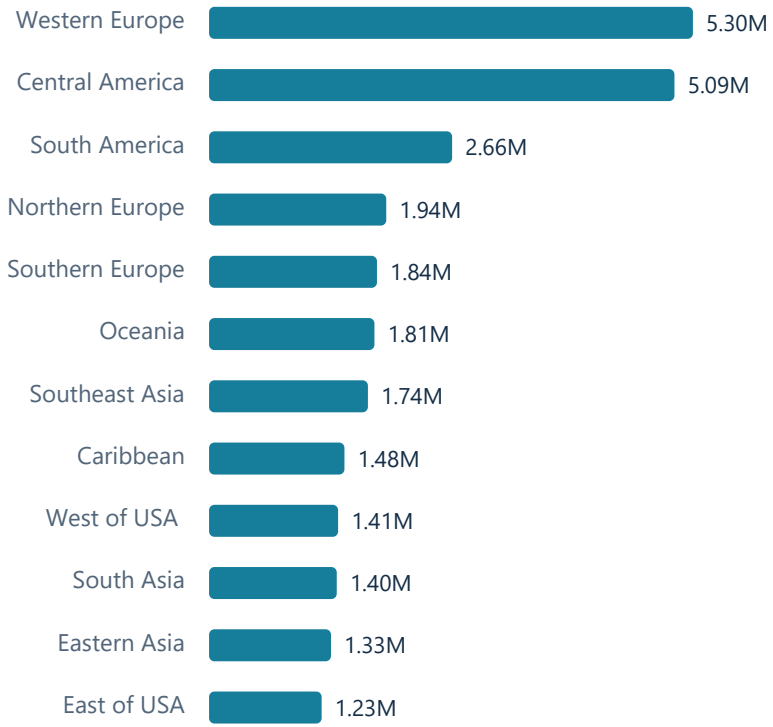

Market	First Class	Second Class	Same Day	Standard Class
Europe	100.0%	80.2%	48.2%	39.8%
LATAM	100.0%	79.4%	50.8%	39.3%
Pacific Asia	100.0%	80.3%	47.9%	40.4%
USCA	100.0%	79.9%	45.6%	40.0%
Africa	100.0%	80.4%	47.1%	39.8%

Eligible order counts	First Class	Second Class	Same Day	Standard Class
Europe	2,753	3,459	949	10,602
LATAM	2,498	3,160	870	9,886
Pacific Asia	2,543	3,338	918	10,054
USCA	1,272	1,614	447	4,845
Africa	536	685	223	2,245

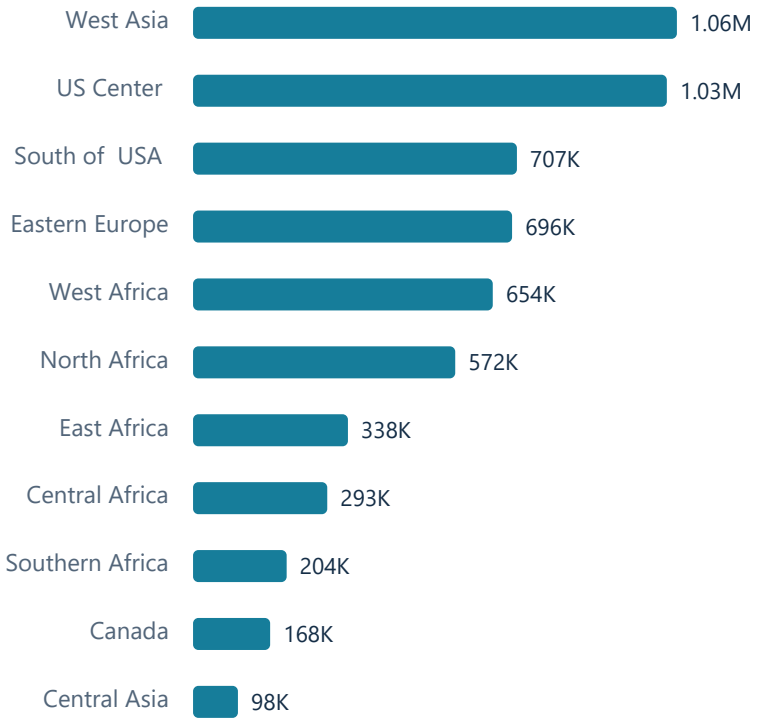

06 Destination regions - complete view

All destination regions are shown. Order geography represents the delivery destination; customer/store coordinates are not used.

Regions ranked by net sales

Remaining destination regions

Route prioritization. Compare volume, value and delivery reliability together. An extreme rate in a small location should not carry the same operational weight as a recurring issue on a major route.

07 Destination markets

Fixed market summary replaces the interactive hierarchy. Every country is listed in the appendix; city-level detail is supplied in CSV.

Market	Orders	Net sales	Recorded profit	Margin	Late rate
Europe	18,561	9,769,198	1,169,443	12.0%	57.4%
LATAM	17,181	9,235,762	1,123,322	12.2%	56.9%
Pacific Asia	17,577	7,434,263	857,753	11.5%	57.7%
USCA	8,579	4,553,500	564,314	12.4%	57.5%
Africa	3,854	2,061,679	252,071	12.2%	56.5%

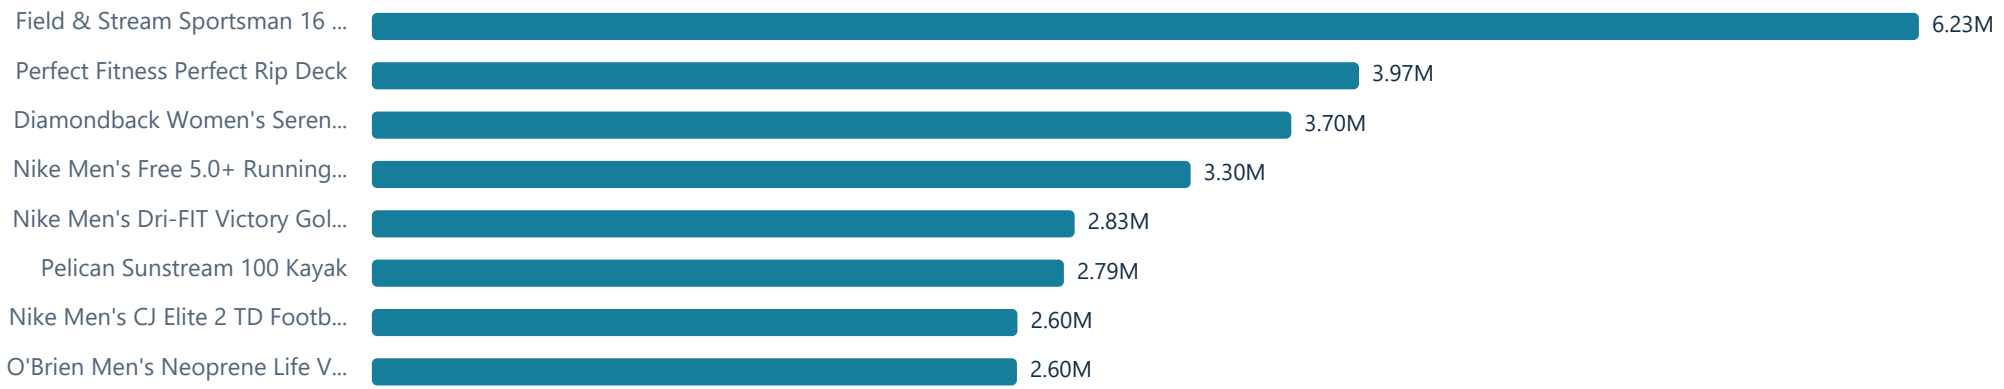

Commercial concentration. Europe and LATAM generated 9.77M and 9.24M respectively, together about 57.5% of net booked sales. Late-associated sales total 18.08M; this is affected business volume, not measured lost revenue.

08 Customers and product portfolio

Customer and product summaries are static and fully labeled. Complete category and product rankings follow in the appendix.

Customer segment	Orders	Net sales	Margin	Late rate
Consumer	34,119	17,164,278	12.1%	57.3%
Corporate	19,856	10,030,650	12.0%	57.2%
Home Office	11,777	5,859,474	11.8%	57.7%

Top 8 products by net sales

Portfolio focus. Fishing is the largest category: 6.23M net sales and 0.76M recorded profit. Assess sales size and margin together. Complete product/category tables avoid reliance on hover tooltips.

09 Order exceptions for review

Deliberate selection: 10 orders with the most negative whole-order recorded profit. This is not the full order population.

Order ID	Order date	Destination country	Net sales	Recorded profit	Delivery status
68859	02 Oct 2017	Reino Unido	2,212	-4,326	Late delivery
70533	26 Oct 2017	Italia	1,350	-3,442	Late delivery
74556	24 Dec 2017	Australia	1,320	-3,366	Advance shipping
70760	29 Oct 2017	Alemania	1,200	-3,000	Late delivery
74508	23 Dec 2017	Afganistán	1,440	-2,592	Shipping on time
70560	26 Oct 2017	Francia	1,500	-2,550	Late delivery
70537	26 Oct 2017	Francia	1,425	-2,351	Advance shipping
70845	31 Oct 2017	Francia	1,455	-2,328	Late delivery
70753	29 Oct 2017	Alemania	1,425	-2,280	Late delivery
70683	28 Oct 2017	Alemania	1,455	-2,255	Shipping on time

Complete investigation data. Orders - Full Detail.csv contains all 65,752 orders, including destination, status, mode and elapsed-day fields. Use it for sorting/filtering; the PDF presents a review shortlist rather than thousands of pages.

10 Business insights and next actions

Full-dataset management brief | Historical snapshot | Findings are descriptive and require operational validation

1. Review delivery commitments

All 9,602 eligible First Class orders missed the scheduled window. Check promise definitions, processing milestones and carrier delivery records before changing the shipping mix.

2. Reconcile the late-period commercial shift

Higher order counts coincide with lower sales and basket values from late 2017. Validate extract completeness, product availability and basket composition before calling it a demand decline.

3. Investigate negative-benefit orders

21.2% of whole orders have a negative recorded benefit. Review loss concentration and product/discount composition; distinguish item-level loss from full-basket profitability.

4. Start where commercial exposure is largest

Europe, LATAM and the Fishing category carry substantial value. Prioritize high-volume routes and material loss exposures while retaining sample-size checks.

5. Agree the data definitions

Confirm source currency, recognized-revenue rules and an independent arrival timestamp. Pending orders already carry delivery labels; this is not a validated live tracking feed.

11 Definitions and interpretation limits

Consistent with the Power BI report | Financial values use source units | Scope is not altered by interactive selections

Financial basis. Gross Sales = sum of Sales. Net Booked Sales = sum of Order Item Total. Recorded Profit = sum of Benefit per order. Margin = total profit / total net booked sales. All order statuses are included.

Order and item grain. Each source row is one order item. Orders use distinct Order ID; shipping-day averages count each order once. Product/category order counts overlap and must not be added to get the overall order total.

Delivery basis. Exclude Shipping canceled from late-rate denominators. Count late orders by the source Delivery Status. Same Day has a zero-day scheduled window. Late-associated sales are exposure, not a loss estimate.

No verified arrival date. The source has order and shipping timestamps but no separate confirmed arrival date. Timestamp elapsed days disagree with the actual-day field for 9,737 items (5.4%); no arrival timestamp is invented.

Source quality. Benefit per order equals Order Profit Per Order, and Sales per customer equals Order Item Total. Duplicate aliases are not summed. Product Description is entirely missing; Order Zipcode is about 86.2% missing.

Currency, status and causality. Currency, carrier, freight cost and full cost definitions are absent. Closed/complete values are status subtotals, not confirmed accounting revenue. Observed associations do not establish causes.

Snapshot and source. Source: DataCoSupplyChainDataset.csv, original full extract, 180,519 items and 65,752 orders. Period: 01 Jan 2015 - 31 Jan 2018. Monetary values are rounded for printing; companion CSVs retain more precision.

A Country performance
